

Edgarley Assisted Living

MEMO

No: .252024

Date: 13/08/2024

Subject: COVID Positive

To: NOK, POA & Families

Hi To All Family Members, POA and NOK's

This memo is to inform you that we have had a positive test of COVID of a resident at Edgarley Assisted Living in the Glenelg Wing yesterday 13/08/2024.

Also, the facility currently has two staff members who have tested positive. This classifies us as an exposure not an outbreak.

The Public Health Unit have been informed of the new case.

There are no changes to visitation for Family members, NOK and POA are still able to visit, but will be required to wear PPE if visiting the one positive resident which includes NP95 mask, gown, and shield. You will be required to put on PPE before entering COVID positive room, and remove before leaving residents room placing in yellow infectious waste bag. Instructions for removal of PPE is placed on wall in the room. Also attend to antiseptic hand rub after leaving room.

For visiting of all other residents in the Glenelg & Mitchell Wings you will be required to wear a NP95 mask and ensure hand hygiene attended on entering the building and on leaving.

When visiting in the Wannan and Henty Wings you will be required to wear standard surgical mask (blue). To decrease the risk of a visitor becoming positive can you please ensure that you put your required mask on when in the air lock. This can help reduce the spread.

All visitors are still required to have a negative RAT test before visiting any area of Edgarley Assisted Living.

Also, if possible, can you please pass onto any friends that may wish to visit this information.

We will continue to update you of further positive cases or changes.

Please if you have any question or concerns relating to this email, please contact me at the facility.

Many Thanks

Trish McKenzie

IPC Lead
