Subject: Influenza, RSV

To: NOK, POA & Families

Hi to All NOK, POA & Family Members,

Notification as it is now influenza, virus season the Department of Health & Ageing and PHU are requesting that facilities touch base with NOK, POA & Family members to remind that standard infection control precautions are important when visiting the facility.

RSV & Influenza are common causes of respiratory illness during the winter months and can cause a range of symptoms from mild to severe with an increased complications in the elderly. To help prevent the spread of both viruses with in aged care facility's involves good hand hygiene, cough etiquette and avoiding close contact when you have symptoms.

We ask that if you are feeling unwell or have any signs or symptoms of influenza, RSV, COVID-19 or common to refrain from visiting or please wear a mask and attend to hand hygiene on entering the facility and residents' rooms. Masks and hand rub are available at the front entrance. We thank you for your cooperation with this.

Please find attached common symptoms for influenza, RSV, COVID-19. If you have any question please contact me.

Kind Regards

Trish McKenzie CI/IPC LEAD
