Edgarley Assisted Living
MEMO
No: .172025

Date: 28/06/2025

Subject: COVID Positive

To: NOK, POA & Families

Hi To All Family Members, POA and NOK's

This memo is to inform you that we have had positive COVID cases in Edgarley Assisted Living in the Wannon/Henty Wing on 27/06/2025. As of 28/06/2025, we have 5 positive residents. This classifies us as an outbreak. The facility currently has no positive staff members. The Public Health Unit will be notified on Monday 30/06/2025, as they are unavailable during weekends.

There are no changes to visitation for Family members, NOK and POA are still able to visit. On visiting any positive resident, we would encourage/ recommend visitors wear PPE for their own protection. Full PPE will be available outside the effected residents' rooms. There are masks at the entry of each wing as well as on entry to facility.

If you have visited a positive resident then wish to visit another resident, please ensure you have changed mask and attended to hand hygiene. Instructions for removal of PPE is placed on wall in the rooms. Also attend to antiseptic hand rub after leaving room.

For visiting of all other residents in the Glenelg & Mitchell Wings we encourage you to wear a mask also.

Also, if possible, can you please pass onto any friends that may wish to visit this information. We will continue to update you of further positive cases or changes.

Please if you have any question or concerns relating to this email, please contact me at the facility.

Many Thanks

Michelle Parry Hill IPC
